

# Lease with Confidence

## Linxup GPS and Dash Cams

Challenging times need creative solutions. To mitigate the risk of loss when leasing vehicles or equipment, many companies are turning to GPS technology.

AssetIQ has partnered with Linxup GPS to provide lending institutions with a powerful technology combo that adds value for borrowers, deters theft, and limits the risk for lenders. With GPS devices and front and rear view 24/7 dash cams, each vehicle you finance is trackable and protected.

### Locate Vehicles Anywhere

Linxup's mapping feature gives you accurate, real-time tracking at a glance. Make fast, informed decisions whether you are at your computer desk or in the field on your mobile device.

### Protect Against Theft

With alerts when vehicles leave geofenced areas, motion-activated LED spotlight, and breaking glass detection, you can rest assured that you'll know instantly if theft is occurring.

### Industry Leading Dash Cam Technology

24/7 cameras capture and record events around your fleet even when engines are off. Camera stores up to 66 hours of rolling alert-generated video footage.

### Better Recovery Management

Locate stolen vehicles or assist in the recovery of vehicles in default of loans.

### Easy to Use

Get your system up and running in minutes with Linxup. Just plug it and start tracking! Our system is so easy to use that clients rarely need our free unlimited training.
